Remorse Forgive
Goodbye
Forget Regret

Word size = Frequency
of use in specified data.

Remorse Forgive
Goodbye
Forget Regret

Clouds are side by side to
compare between
groupings

Operations:

Each Dashboard allows
the user through
various interactive
elements (radio
buttons/dropdowns)
what types of prisons
they want to include.

Hover action displays
the amount of times that
word was actually used
in the dataset as an
integer in a small popup
text box.

adding filtering
options.

Discussion:

ADVANTAGES:

- Allows user to
compare
variables relevant
to them and their
purpose.
- Size is fairly easy
to distinguish
between.

DISADVANTAGES:

- Not a very
detailed look at
this dataset.
- Much of the
meaning of data
is up to user
interpretation.
