

# Ideas

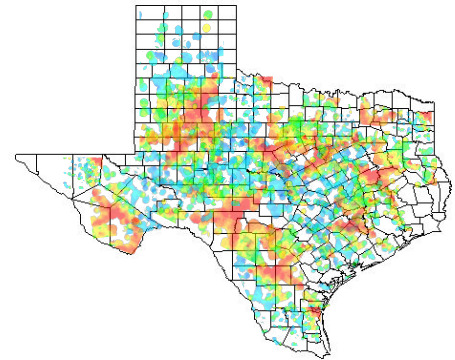

- Bar graph: Display the statistical data from the campaign finance set.

- Network: Show the connection between politicians, private prisons, and donations from PACs and Super PACs.

- Word Cloud: We can take the last words of death row prisoners and create a word cloud that changes in intensity based on how common the word is.

- Geographical + Heat Map: Show a comparative frequency of words from the prisoner data.

# Filter

- We are focusing on heading in the direction of a interactive map that shows both campaign finance and the last words data - bar chart would not work for that.
